#### CARATTERISTICHE DI LAVABI, PIATTI DOCCIA, MOSAICI E RIVESTIMENTO IN PIETRA NATURALE

La caratteristica delle pietre naturali è la presenza di varie venature, colori e tonalità così come la presenza di piccole 'micro-rifture' e buchi che non sono difetti ma parte nella 'naturalità' dei prodotti in pietra naturale. La perfezione della superficie è raggiungibile solo nei prodotti in resina o in ceramica, realizzati con procedimenti industriali.

Per questa ragione nella tappa finale della fabbricazione dei lavabi e dei piatti doccia, per alcune tipologie di pietra (che in natura hanno delle micro rifture e dei buchi) i nostri prodotti vengono sottoposti ad una procedura di controllo, e i buchi o le micro rifture vengono 'perfezionati', miscelando la resina con i residui di polvere della stessa pietra.

PULIZIA per lavabi, piatti doccia, mosaici, palladiana, sassi e rivestimenti in pietra naturale

Per la pulizia quotidiana di tutte le pietre naturali, raccomandiamo assolutamente di utilizzare SOLO ACQUA, oppure PRODOTTI DETERGENTI NEUTRI PER PIETRE NATURALI A BASE DI ACQUA e non altri prodotti a base acida, che possono rovinare la struttura e superficie della pietra in poche settimane!

TRATTAMENTO per lavabi, piatti doccia, mosaici, palladiana, sassi e rivestimenti in pietra naturale

E' ASSOLUTAMENTE INDISPENSABILE PROCEDERE CON L'APPLICAZIONE DI UN TRATTAMENTO AL MOMENTO DELL'INSTALLAZIONE, da ripetere poi periodicamente, secondo l'uso e la durezza dell'acqua.

Puo'essere utilizzato SOLO un prodotto per pietre naturali per proteggere la pietra nel tempo.

#### NATURAL STONE CHARACTERISTICS OF BASINS, SHOWER-TRAY AND OUR COMPLETE NATURAL STONE COLLECTION

Natural stone's characteristics are the presence of various veins, colours and shades on same plan, as well as micro-cracks and holes, that are not defect but part of naturalness of all natural stones' products. Complete surface's perfection is possible only in resin or ceramic products, made with industrial procedures.

For this reason, at final stages of basins and shower tray fabrication, for some stones (that in nature have micro-cracks and holes), our products will go through complete control procedures, such as mixing proper colour resin with residues to refine holes or micro-cracks.

STONE CLEANING for basins, shower-tray, mosaics, palladiana, pebbles and wall cladding

As for all natural stones, it's essential for daily cleaning, ONLY WATER or NEUTRAL DETERGENT 'S PRODUCTS FOR STONES, WATER BASE'S PRODUCTS, and no other acid base 's products that can damage the stone structure and surface in no less than few weeks!

MAINTENANCE CARE for basins, shower-tray, mosaics, palladiana, pebbles and wall cladding

IT'S ABSOLUTELY ESSENTIAL APPLY A NATURAL STONE'S TREATMENT AT THE MOMENT OF THE INSTALLATION and repeat it, periodically, according to the usage habits, situation and different calcareous water. It can be utilized ONLY natural stone's treatments.

#### CARACTERISTIQUES PIERRES NATURELLES POUR LES VASQUES, BAC A DOUCHE, MOSAIQUES, PIERRES DE PAREMENTS

La caractéristique des pierres naturelles est la présence de différentes veines, couleurs, tonalités ainsi que des microfissures et des cratères, qui ne sont pas des défauts, mais la particularité des produits en pierre. La perfection des surfaces et la régularité des teintés, ne s'obtiennent qu'avec des procédés industriels et avec des matières telles que la céramique ou la résine.

Pour ces différentes raisons, dans les phases finales de la production des vasques, des bacs à douche et de certains produits pierre, nos fabrications passent à travers des procédures strictes de contrôle et que les finitions de surface sont exécutées à l'aide d'un mélange de résine et de pierre identique.

NETTOYAGE pour vasques, bacs à douche, mosaïques, palladiana, galets, pierres de parements

Pour toutes les pierres naturelles, pour l'entretien quotidien c'est indispensable utiliser SEULEMENT EAU, ou PRODUITS DETERGENTS NEUTRES POUR PIERRE A' BASE D'EAU, et pas de produits acides que peuvent abimer la pierre en quelques semaines!

TRAITEMENT pour vasques, bacs à douche, mosaïques, palladiana, galets, pierre s de parements

C'EST ABSOLUMENT INDISPENSABILE PROCEDER AVEC UN TRAITEMENT POUR PIERRES AU MOMENT DE L'INSTALLATION et le repeter periodiquement selon l'utilisation, la dureté et quantité de calcaire contenue dans l'eau. Il faut utiliser seulement traitements pour pierres naturelles.

#### NATURKENNZEICHEN VON STEIN WASCHBECKEN, DUSCHBECKEN, MOSAIKE UND WANDVERBLENDER

Naturbedingte Unterschiede in der Farbe, in der Äderung, sowie Mikrorisse und Löcher, sind keine Fehler sondern Eigenschaft der Naturstein Produkte.

Vollkommene Fläche kann man nur bei industrieller Keramik oder Harzproduktionen kriegen.

Deswegen werden alle Becken am Ende der Produktion durchgeprüft, und eventuell mit einer Mischung aus Harz und Marmorstaub behandelt, um die natürliche Mikrorisse und Löcher vervollkommen.

NATURSTEIN REINIGUNG fuer Waschbecken, Duschbecken, Mosaïke, Palladiana, Wandverblender

Zur täglichen Behaltung und Reinigung ist es unverzichtbar NUR WASSER oder STEIN-NEUTRALE

WASSERBASIS PRODUKTE utlizieren. Alle andere Reinigungsprodukte koennen in sehr kurzer

Zeit die Steinstruktur und Steinflaesche beschaedigen!

BEHANDLUNG fuer Waschbecken, Duschbecken, Mosaïke, Palladiana, Wandverblender

Sofort nach der Einsetzung ist UNVERZICHTBAR EINE ERSTE BEHANDLUNG MIT MARMOR ODER NATURSTEINE GEEIGNETEN LOSUNGSMITTELPRODUKT VORZUNEHMEN.

Periodische Behandlungen, nach der Haerte des Wassers, so wie dem Gebrauch muss man dann immer mit Marmor oder Naturstein Produkte wiederholen.

# Sezione

## LAVABI ACCESSORI PIATTI DOCCIA

Forme a colonna dalle differenti geometrie in Marmi e pietre naturali lavorati da un unico blocco monolitico con levigatura omogenea o con combinazione di finiture sulla superficie esterna, per soddisfare differenti esigenze sia in termini stilistici sia funzionali.

Pedestal basin shaped with different designs always starting from a single monolithic block and using the most precious marbles and natural stones with homogeneous smooth finish or with an especial finishing combining gloss and hammered surface, to satisfy different functional and aesthetic requirements.

Vasques polies aussi bien à l'intérieur qu'à l'extérieur ou brut à l'extérieur et poli intérieurement. Elles sont taillées dans des blocs colonne de différentes formes afin de satisfaire les diverses fonctionnalités et style.

Säulen in verschiedener geometrischer Formen aus Marmor und Natursteine, die aus einzigen monolithischen Marmorblöcken entnommen sind. Die können entweder eine gleichartige Glättung oder eine äußerliche gemischte Feinbearbeitung aufweisen, um alle stilistischen und praktischen Anforderungen zu erfüllen.

Forme essenziali e minimal per questi lavabi in appoggio ottenuti SELEZIONANDO BLOCCHI MONOLITICI DI MARMO lavorati sia a contrasto fra superficie lucida interna e bucciardata esternamente, o lucida all'interno così come all'esterno.

Essential and minimal shape design for over counter basins obtained from selected single marble block sculpted and finished both in polish inside and outside or with polish surface inside and rough-matt outside.

Formes essentielles et minimales pour ces vasques à poser obtenues après la sélection de blocs monolithiques de marbre, travaillés pour obtenir une surface interne et externe poli, ou interne poli et externe brut.

Wesentliche und minimale Formen für diese aus der sorgfälligen Auswahl von monolithischen Marmorblöcken herauskommende Tischbecken, die komplett poliert sein können, oder äußerlich grab bearbeitet mit polierter Innenseite.

Geometrie squadrate e spigolose per lavabi in appoggio lavorati con linee da sapore retrò disponibili in differenti tipologie di marmi e pietre nobili.

Squared and geometric over counter basins designed with retro style, available in different fine marbles variety.

Vasques à poser aux lignes pures et géométriques disponibles en différentes typologie de marbre et pierres nobles.

Viereckige und kantige Geometrien mit altmodischer Linien für diese Tischwaschbecken, die aus verschiedener Typologien von Marmor und Edelsteinen verfügbar sind.

Ogni piatto doccia è realizzato da blocchi monolitici nel rispetto degli ingombri e delle caratteristiche tecniche necessarie al completamento del box doccia.

Each shower tray is obtain from a monolithic single block and shaped with specific technical feature and dimensions to fit the shower box standards.

Bac à douche réalisé à partir de bloc monolithique dans le respect de la dimension et des caractéristiques techniques des box douche

Entsprechend Maßen und technischer Eigenschaften für die Ergänzung der Duschkabinen sind alle Duschbecken aus einzigen monolithischen Marmorblöcken entnommen.

Bardiglio Scuro

### SHAPE

Quadrata

Rettangolare

Pezzi unici e irripetibili di finissimo e rarissimo marmo totalmente made in Italy scolpito a regola d'arte per lasciare intatta la caratteristica tecnica ed estetica della materia prima naturale. Ogni lavabo ha venature caratteristiche che lo rendono unico per forma e accento cromatico.

Unique pieces of rare made in Italy marble perfectly sculpted in order to leave the technical characteristic and aesthetics of raw material intact. Every sink has his own characteristics veins that make each piece unique by shape and chromatic accent.

Pièces uniques de précieux marbre italien parfaitement sculpté aux règles de l'art pour laisser intactes les caractéristiques techniques et esthétiques de la matière première. Tous les vasque ont des caractéristiques qui font que chaque vasque soit unique par sa forme et couleur.

Bei den in Italien produzierten Becken, handelt es sich um Einzelstücke aus hochwertigen -und sehr seltenen Marmor. Jedes einzelne Produkt ist in ein Unikat, welches mit der charakteristischen Aderung und dem fein abgestimmten Farbspiel ihre Eleganz hervorhebt. Die perfekte Verarbeitung des Materials trägt dazu bei, die ästhetischen Eigenschaften des natürlichen Rohstoffs zu erhalten.

Уникальные и неповторимые изделия из очень тонкого и чрезвычайно редкого мрамора, полностью изготовленные в Италии, доведены до совершенства таким образом, чтобы оставить неповрежденными его техническую и эстетическую характеристику. Каждый умывальник имеет характерные вены, которые делают его уникальным как по форме так и в цветовых акцентах.

Sassi di fiume dalle forme tondeggianti. I moduli per la posa vengono montati su rete in fibra attraverso uno schema irregolare per perdere, una volta posati, la matrice di base ed offrire un'immagine d'insieme esteticamente migliore.

Mosaici di marmi ed onice dalle forme irregolari e dalla superficie piatta, che vengono burattati per arrotondare i bordi, poi montati su rete in fibra attraverso uno schema irregolare per offrire un'immagine d'insieme esteticamente migliore a modello "opus incertum" tipico delle famose ville venete del Palladio.

Sasso piatto

Sasso bombato

Sasso gigante

Marmo

Marmo Mix

Meteor

River

Real river stones in round shape. The mosaic modules on a fibre net are specifically designed to lose the "tile look" after the installation. This irregular scheme allows the natural product to display a homogeneous rug surface to offer an esthetical whole look most similar to a riverbed.

Natural mosaics in marble and onyx with irregular shape and flat surface, with blunted edges and assembled on fibre net. The mosaic modules on a fibre net are specifically designed to lose the "tile look" after the installation. This irregular scheme allows the natural product to display a homogeneous rug surface to fit the "opus incertum" model typical of the famous Palladio's venetian villas.

Runde Formen und verschiedene Oberflächen für diese Flusskiesel, die laut einem unregelmässigen Schema auf Fibernetz geklebt werden, damit die Fugen nach der Verlegung nicht so sichtbar sind.

Unregelmässige Formen und platte Oberflächen für diese Marmor oder Onyx Mosaïke. Um die Borden abzurunden, werden die gebeutelt, und erst danach laut einem unregelmässigen Schema auf Fibernetz geklebt, damit die Fugen nach der Verlegung nicht so sichtbar sind, und ein schöneres im „opus incertum“ Styl Gemeinsambild anzubieten, der typisch der berühmten venezianischen Villas von Palladio war.

### CREAM TEAK Crema di cera d'api per teak

Flacone 250 ml €6,50 / pz  
Prezzo netto Net price Prix net Netto preis

CODE: TEAKCREAM

CREAM TEAK è una cera liquida, morbida e ricca di cera d'api, a base d'acqua, per la finitura di superfici in legno naturale come il teak, precedentemente protetto con PRIMER TEAK 30.

CREAM TEAK fa risaltare tutta la bellezza naturale delle superfici, ravvivandole e mantenendole nel tempo. Penetra nelle fibre del legno e, usato regolarmente, nutre, protegge e favorisce la pulizia delle superfici rendendole antistatiche alla polvere.

MODALITA' D'USO: Prodotto pronto all'uso. Applicare a pennello un velo leggero di prodotto e uniformare. A superficie asciutta lucidare con spazzola o con panno di lana.

Resa: 2 mq con 250 ml.

CREAM TEAK est une émulsion liquide, douce et riche à la cire d'abeille, à base d'eau, pour la finition des surfaces en bois naturel comme le teck, précédemment protégé avec PRIMER TEAK 30. CREAM TEAK redonne toute la beauté naturelle des surfaces en le ravivant, et le maintient dans le temps.

Elle pénètre dans les fibres du bois et, utilisée régulièrement, nourrit, protège et favorise le nettoyage des surfaces en le rendant antistatique à la poussière.

EMPLOI: Produit prêt à l'usage. Appliquer au pinceau un voile léger de produit et uniformiser. Lorsque la surface est sèche, nettoyer avec une brosse ou un chiffon en laine.

Réappliquer périodiquement si nécessaire. Rendement: 2 m2 avec 250 ml.

CREAM TEAK is a liquid, soft, water-based beeswax for natural wood and teak surfaces, already protected with PRIMER TEAK 30.

CREAM TEAK helps revive and keep during the time the natural beauty of wood surfaces, penetrates the woods fibers and usually used feeds, protects and helps keep the surfaces cleaned and antistatic.

INSTRUCTIONS: CREAM TEAK is ready for use. Apply with a paintbrush a uniform light part of product. On dry surface polish with woolen cloth or brush.

Yield: 2 sqm/250 ml.

CREAM TECH ist ein fluessiges Wachs, weich und reich von Bienenwachs. Auf Wasserbasis fuer die Endbearbeitung von natuerlichen Holzoberflaechen wie Teak, zuvor geschuetzt mit PRIMER TEAK 30. CREAM TECH verherrlicht die natuerliche Schoenheit der Oberflaechen und behaltet sie im Laufe der Zeit bei. Es penetriert in die Fasern des Holzes und wenn es regelmaessig verwendet wird, naehrt, schuetzt und erleichtert die Reinigung der Oberflaechen damit sie antistatischem dem Staub werden.

VERWENDUNG: Das Produkt ist Gebrauchsfertig. Mit einem Pinsel eine dunne Schicht des Produktes anwenden. Bei glaenzender Oberflaeche mit einem Pinsel oder Woltuch polieren. Ausbeute: 2 Qm mit 250,00 ML.

### PRIMER TEAK 30 Idrorepellente concentrato per rivestimenti in teak

Flacone 250 ml €15,00 / pz  
Prezzo netto Net price Prix net Netto preis

CODE: TEAKPRIME

PRIMER TEAK 30, base acqua, è un protettivo idrorepellente di nuova generazione nanotecnologia per legno. PRIMER TEAK 30 non altera la traspirazione, non pellicola ed è particolarmente indicato per rivestimenti in teak.

MODALITA' D'USO: Agitare prima dell'uso. PRIMER TEAK 30 è concentrato. Diluire in acqua 1:5 - 1:6 e applicare la soluzione a temperatura ambiente, su superfici spolverate e asciutte. Uniformare con pennello. A superficie asciutta applicare CREAM TEAK.

AVVERTENZA: Teme il gelo (stoccare a temperatura minima +5°C); non esporre al sole. Durante l'applicazione aver cura di tirare bene il prodotto in modo uniforme. Resa: 3-4 mq/L di diluito.

PRIMER TEAK 30, à base d'eau, est une protection hydrofuges de nouvelle génération nano technologique pour bois. PRIMER TEAK 30 laisse respirer le revêtement, ne forme pas de film et est particulièrement indiqué pour les revêtements en teck.

EMPLOI : agiter avant l'emploi. PRIMER TEAK 30 est concentré (1 flacon de 250ml pour obtenir 1,5 litre de prêt à l'usage). Délayer à l'eau 1:5 et appliquer la solution à température ambiante, sur surfacés épousés et secs. Uniformiser avec le pinceau. A surface sec appliquer CREAM TEAK.

AVERTISSEMENT: stocker à température minime de +5°C ; ne pas exposer au soleil. Appliquer le produit de façon uniforme jusqu'à saturation de revêtement. Rendement: 3-4 m2 par main dilué.

PRIMER TEAK 30, water-based, is a waterproof protection of new generation, for wood.

Primer Teak 30 does not disfigure the wood transpiration, does not make film and is particularly indicated for wood claddings.

INSTRUCTIONS: Shake well before using. Primer teak 30 is concentrate. Dilute with water 1:5-1:6 and apply product at room temperature, on dry and clean surfaces. Uniform with a brush. After, just on dry surfaces apply Cream Teak.

WARNING: Primer teak 30 does not tolerate the frost. (Stock at +5°C temperature) Do not expose to sunlight. Have care to apply the product uniformly. Yield: 3-4 sqm/Lt. Already diluted product.

PRIMER TEAK 30, auf Wasserbasis ist ein Wasserabweisender Schuetz einer neuen Generation der Nanotechnologien des Holzes. PRIMER TEAK aendert nicht die Traspira-tion, erzeugt keinen Film und ist besoders fuer Teak Beschichungen empfohlen.

VERWENDUNG: Vor Gebrauch schueteln. PRIMER TEAK 30 ist konzentriert. Im Wasser verduennen: 1:5 - 1:6 dann die Loesung beim Raumtemperatur auf bestaeuble und trockene Oberflaechen anwenden. Dann uniform mit einem Pinsel verbreiten.

WARNUNG: Frostgefahr , bei einer Tiefsttemperatur von (+5 C) immer behalten. Nicht in die Sonne aussetzen. Waehrend der Anwendung das Produkt gut und gleichmaessig verbreiten. Ausbeute: 3-4 Qm/L vom verwaessertem Material.

## CONDIZIONI GENERALI DI VENDITA

### 1 - APPLICABILITY OF CONDITIONS

1.1 These general conditions (the "CONDITIONS") constitute the most important part of each contract of sale of tiles and any other ceramic material (the "PRODUCTS") in which IMSO CERAMICHE (the MANUFACTURER) is one of the parties. Excepted single cases in which they have been derogated by explicitly written agreements signed by the MANUFACTURER, they will constitute the exclusive discipline of such sales. If one or more parts of these CONDITIONS, or of single contracts including them, result to be invalid, the general or the particular CONDITIONS will remain valid as a whole: invalid parts will be substituted through agreements that are as close as possible to the original will of the parties.

### 2 - CONCLUSION OF THE CONTRACT OF SALE - DELIVERY

- 2.1. The contract is intended to be concluded at the moment in which the written consent of the counterpart has come to the knowledge of the proponent and of the person ordering the contract.
- 2.2. The order that has not been confirmed in writing cannot be considered accepted in any case, except for the performance of the contract itself by the MANUFACTURER through shipment or delivery of the PRODUCTS. The partial delivery of ordered PRODUCTS doesn't involve that the whole order has been accepted, but only that part of PRODUCTS actually delivered.
- 2.3. Except a different written agreement, the delivery of PRODUCTS in Italy or abroad will take place "ex-works".
- 2.4. Except a different agreement, all the dates given as delivery dates are intended in a indicative sense.

### 3 - CHARACTERISTICS OF THE PRODUCTS - WARRANTY - COMPLAINTS

- 3.1. Ceramic tiles and other ceramic PRODUCTS produced by IMSO CERAMICHE comply with European norms UNI-DIN-EN. The MANUFACTURER sells exclusively to professional resellers that are responsible for the accuracy of technical informations given to final users and/or to retailers. The classification of a product is indicated by the MANUFACTURER on advertising material and/or on price lists. Therefore the purchaser must use the PRODUCTS according to the classification given by the MANUFACTURER. To facilitate the directions for the use of products and to adapt standard classifications to the specificity of the production, marks connected with each single product are put in price lists and catalogues, indicating the specific use advised by the MANUFACTURER.
- 3.2. Differences in the tone are not defects of the PRODUCT but a characteristic of the specific material fired at high temperatures. The particular requisite of frost resistance is applied only to those PRODUCTS explicitly guaranteed by the MANUFACTURER with the relative indication on advertising material and/or price list. In case this indication is not given, ceramic materials are considered only and exclusively for indoor use or use in places protected from bad weather.
- 3.3. Ceramic materials with polished surface can never be used in places located on the ground floor with access outside or in places with great pedestrian traffic. In addition polished tiles are susceptible for a certain slipperiness especially when they are wet. The MANUFACTURER advises therefore not to use them in public places. In places with great pedestrian traffic the purchase will have to buy only those PRODUCTS classified by the MANUFACTURER as PEI V, and in particular those tiles that the MANUFACTURER advises SPECIFICALLY for use in public places.
- 3.4. The pictures of the PRODUCTS on leaflets and on other advertising material by the PRODUCER are only illustrative and they don't represent necessarily the final esthetic result of laying of the PRODUCT.
- 3.5. The MANUFACTURER guarantees the good quality and the absence of defects of the products supplied, the warranty is not applied to those PRODUCTS classified by the MANUFACTURER as non-first-quality products or to lots of PRODUCTS of the end of a series, sold in bulk and pointed out as special lots. However a 5% tolerance is provided.
- 3.6. The MANUFACTURER is not responsible for defects and/or anomalies found out in the PRODUCTS that are not due to their quality, but to an improper use of them by the purchasers and/or by their assignees. In particular the MANUFACTURER doesn't accept complaints or contestations concerning the above mentioned situation.
- 3.7. Complaints must be communicated by the purchaser to the MANUFACTURER within 8 days from the delivery of goods. In case of defects, the term is 8 days from the discovery. In any case the MANUFACTURER is not responsible for the defects denounced 12 months after the delivery of the PRODUCTS to the purchaser. In case of hidden defects the warranty is applied up to 2 years after the delivery of the PRODUCTS to the first purchaser. The denunciation of defects must be notified to the MANUFACTURER within and not later than 8 days from the discovery.
- 3.8. In general the warranty is applied only for defects found out in products that have not yet been laid. In case of hidden defects, detectable only after laying, it's necessary for the MANUFACTURER to verify that the laying has been carried out duly (conforming to DIN 18352).
- 3.9. The MANUFACTURER's warranty is limited to the substitution of faulty PRODUCTS with other products of the same model without defects, freight included. The reimbursement of other expenses or additional costs, and in particular demolition costs and money paid for a second laying of the PRODUCTS is excluded. In any case the MANUFACTURER's warranty cannot exceed 5 times the value of the contested material, with an absolute maximum of 10.000 euro.
- 3.10. The MANUFACTURER is not responsible for complaints due to a classification of the ceramic material by foreign bodies for control and/or certification, that is different from the Italian one, according to technical specifications that don't correspond to those used by the MANUFACTURER. In case of technical expertise activated by the purchaser, this must be necessarily based on the conformity of the sold material with the specifications indicated by the MANUFACTURER in force in Italy.

### 4 - PRICES AND CONDITIONS OF PAYMENT

4.1. The sale prices of PRODUCTS are those indicated in the price list of the MANUFACTURER in force at the moment of the confirmation of the order. In case of contracts of sale and delivery of goods divided in parts, and if there is no written agreement. On the subject, the price is the one indicated in the price list in force at the moment of the delivery of each single portion of goods. For all the PRODUCTS destined to the foreign market prices can be calculated at MANUFACTURER's choice in the foreign currency of the destination country or in Italian lire. Every bank and negotiation costs have to be debted to the Purchaser. In case of delay in the payment the MANUFACTURER has the right, without the necessity of putting into mora to cash a moratory interest amounting to the official discount rate in Italy, plus 5%, apart from economical damages occurred.

### 5 - MANUFACTURER'S AGENTS

- 5.1. The MANUFACTURER's agents promote sales but are not authorized to act in the name and on the behalf of the MANUFACTURER, except in case of a specific written permission.
- 5.2. The orders transmitted by the agents don't bind the MANUFACTURER. Therefore they must be accepted explicitly in writing by the MANUFACTURER.

### 6 - RESERVED DOMINION

6.1. It's agreed between the parties that the sale of the PRODUCTS is carried out with reserve of propriety in favour of the MANUFACTURER up to the total payment of the agreed price, according to the Italian Civil Code, art. 1523 and following. However the risk of deterioration of the goods passes to the purchaser from the moment of delivery of the PRODUCTS. In the sales of the PRODUCTS abroad, in case the goods are sold and delivered to third customers before the transfer of title, within the ordinary trade relations of the purchaser himself, the reserve of property in favour of the MANUFACTURER remains also towards third customers, when the law permits it.

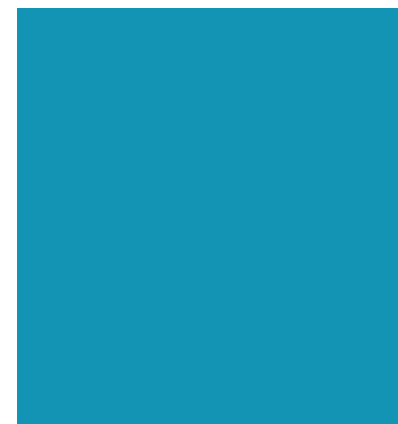

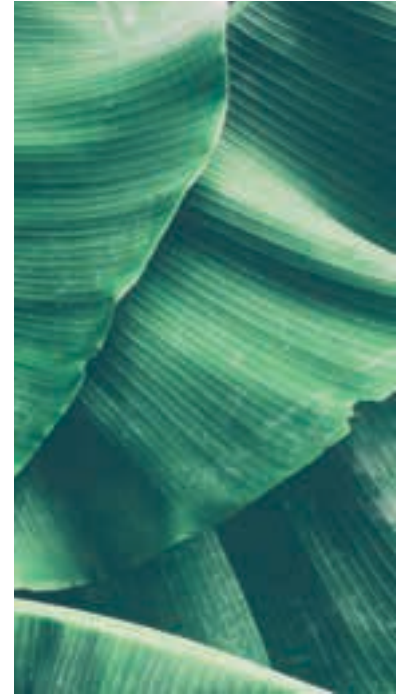

6.2. In case of mora of the Purchaser, the MANUFACTURER can take back all the goods object of reserved dominion without any formality, included the putting into mora, and if the law permits it, all documents of credit to third people relative to these goods, with reserve of any proper legal remedy for the prejudices suffered.

### 7 - SUPERIOR FORCE.

7.1. The MANUFACTURER is not responsible towards the Purchaser for non-fulfillment, included non-delivery or delay in delivery due to events outside his reasonable control, as for example non-delivery or delay in delivery of materials by the suppliers, breakdown of plants, strikes or other sindical actions, interruption of energy supply, interruption or difficulty of transports.

### 8 - APPLICABLE LAW - COMPETENT COURTS

- 8.1. The contracts of sale to export in which the MANUFACTURER is one of the party are governed by the Italian law and in particular by the "Preservation of International Contracts of Sale" of movables, where it's not derogated by these CONDITIONS and by the Convention of Vienna (11 April 1980).
- 8.2. The competent court for any controversy concerning the sale of the PRODUCTS by the MANUFACTURER and the trade relation connected with the above mentioned sales is the court of the registered office of the MANUFACTURER, even when the legal action started concerns documents of credit released to the MANUFACTURER, as means of payment.
